Significant Dates in the Development of Gatehouse and District

When we were trying to arrange our old postcards into date order we needed to create a brief list of dates when certain buildings were constructed or demolished. This only affected the late 19th century onwards, but we thought that it might be useful to construct a more complete timeline which we include below. The source for many of these dates cannot necessarily be regarded as "official". They are provided as a general guide to the order of development, rather than an accurate catalogue.

If you are aware of errors, or think there are significant events that we have missed, please email us and we will be pleased to add them.
